Table 4

Charger Voltage Settings for Deep-Cycle Flooded/Wet Batteries						
System Voltage	6 Volt	8 Volt	12 Volt	24 Volt	36 Volt	48 Volt
Daily Charge	7.4	9.87	14.8	29.6	44.4	59.2
Absorption Charge for RE Applications	7.05 — 7.35	9.4 — 9.8	14.1 — 14.7	28.2 — 29.4	42.3 - 44.10	56.4 – 58.8
Float Charge	6.6	8.8	13.2	26.4	39.4	52.8
Equalize Charge	7.8	10.4	15.5	31.0	46.5	62.0

The chart below illustrates a typical recharge profile:

#### Diagram 4

## **Recommended Deep-Cycle Flooded/Wet Charging Profile**

Note: Charging time will vary depending on battery size, charger output, and depth of discharge.

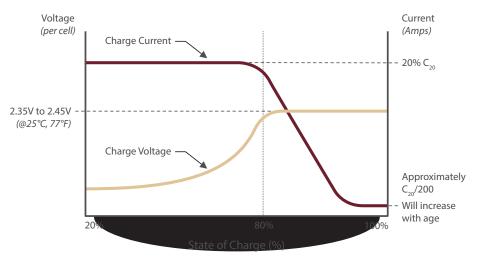

Tb

Charger Voltage Settings for Deep-Cycle AGM Batteries							
System Voltage	6 Volt	8 Volt	12 Volt	24 Volt	36 Volt	48 Volt	
Daily Charge	6.9 – 7.2	9.2 — 9.6	13.8 — 14.4	27.6 — 28.2	41.4 — 42.3	55.2 – 56.4	
Absorption Charge for RE Applications	7.05 — 7.35	9.4 — 9.80	14.1 — 14.7	28.2 — 29.4	42.3 – 44.1	56.4 – 58.8	
Float Charge	6.75	9.0	13.5	27	40.5	54	

The chart below illustrates a typical recharge profile:

## **Recommended Trojan Deep-Cycle AGM Charging Profile**

Note: Charging time will vary depending on battery size, charger output, and depth of discharge.

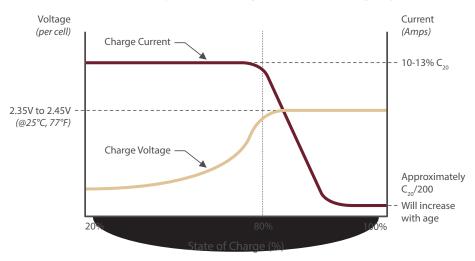

Table 6

Charger Voltage Settings for Deep-Cycle Gel Batteries							
System Voltage	6 Volt	8 Volt	12 Volt	24 Volt	36 Volt	48 Volt	
Daily Charge	6.9 - 7.2	9.2 — 9.6	13.8 — 14.4	27.6 — 28.2	41.4 - 42.3	55.2 - 56.4	
Absorption Charge for RE Applications	7.05 — 7.2	9.4 — 9.6	14.1 — 14.4	28.2 — 28.8	42.3 - 43.2	56.4 - 57.6	
Float Charge	6.75	9.0	13.5	27	40.5	54	

The chart below illustrates a typical recharge profile:

#### Diagram 6

## **Recommended Trojan Deep-Cycle Gel™ Charging Profile**

Note: Charging time will vary depending on battery size, charger output, and depth of discharge.

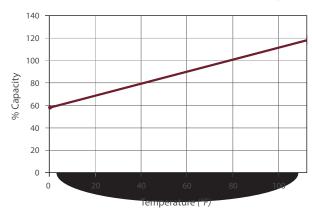

## 6 How to Maximize the Performance of your Trojan Battery

- > Follow all the procedures in this User's Guide for proper installation, maintenance and storage.
- > Do not discharge your battery more than 80%. This safety factor will eliminate the chance of overdischarging and damaging your battery.
- ➤ If you have any questions or concerns about battery care, please contact Trojan Battery Company's technical support engineers at 800-423-6569 Ext. 3045 or +1-562-236-3045 before a problem develops.

## **6 What to Expect from your Trojan Battery**

- A new deep-cycle battery will not deliver its full rated capacity. This is normal and should be expected as it takes time for a deep-cycle battery to reach maximum performance or peak capacity.
- > Trojan's batteries take between 50 100 cycles to work up to providing full, peak capacity.
- ▶ When operating batteries at temperatures below 80°F (27°C) they will deliver less than the rated capacity. For example at 0°F (-18°C) the battery will deliver 50% of its capacity and at 80°F (27°C) it will deliver 100% of its capacity.
- ▶ When operating batteries at temperatures above 80°F (27°C) they will deliver more than the rated capacity but the battery life will be reduced.
- > The life of a battery is difficult to predict, as it will vary with application, frequency of usage and level of maintenance.

### **Temperature versus Capacity**

Trojan batteries are available worldwide. We offer outstanding technical support, provided by full-time application engineers. call 800.423.6569 or + 1.562.236.3000 or visit www.trojanbattery.com
